

In the Claims

1. (currently amended) A self watering tray for a plant pot, comprising:
 - a tray, the tray having side walls and a bottom wall, the tray holding fluid; and
 - at least one post extending upwardly from the wall of the tray either side wall or bottom wall, or between the side and bottom wall for supporting a plant pot, each of the at least one post (posts) separate from each other, and not hollow, the at least one post making enough space for reserving fluid in the tray.
- 2-26. (canceled)
27. (currently amended) A self watering tray for a plant pot, comprising:
 - a tray, the tray having side walls and a bottom wall, the tray holding fluid; and
 - at least one leg coupled to the tray, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, the low section having a closed side wall and a top wall, and it's hollow, the up section extending upwardly from the center of the top wall of low section, a shoulder between the up section and the low section supporting the plant pot.
28. (canceled)
29. (previously presented) The tray of claims 1, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the tray through the fluid intake lip.
- 30-43. (canceled)
- 44.(currently amended) The tray of claim 27, wherein the up section is hollow, the

at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the tray.

45. (currently amended) The tray of claim 27, wherein a wick is accompanied while the up section is not hollow (~~at least one leg can not be filled fluid sucking material~~).

46. (canceled)

47. (previously presented) The tray of claim 1, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the tray.

48. (previously presented) The tray of claim 47, further comprising a tube, the wick insert into the tube.

49. (previously presented) The tray of claim 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the tray, so that fluid can easily be added into the plate through the fluid intake lip.

50. (presented amended) The tray of claim 29, wherein the at least one (~~support~~) post having second section, the second section extending upwardly from the (~~support~~) post.

51. (previously presented) The tray of claim 27, further comprising a bottom wall on low section of the at least one leg, at least one hole disposed on/or near the bottom wall for fluid communication in and out of the leg.

52. (previously presented) The tray of claim 27, further comprising a pad under the leg for standing more stable on the tray bottom.

53. (currently amended) A self watering tray for a plant pot, comprising:

a tray, the tray having a side wall and a bottom wall, the tray holding

fluid; and

at least one leg having at least three wings, the at least one leg with at least three wings formed by a center part and at least three wings, the at least three wings extending outwardly from the central part, the at least one (~~three wing~~) leg with at least three wings coupled to the tray for (~~supports~~) supporting a plant pot.

54. (currently amended) The tray of claim 53, wherein a pad disposed under (~~the~~) at least one three wing leg for standing in the tray more stable.

55. (currently amended) The tray of claim 53, wherein (~~the~~) at least one three wing leg extending upwardly from the bottom wall of the tray.

56. (currently amended) The tray of claim 53, wherein an up section extending upwardly from (~~the~~) at least one three wing leg.
